Offshore Service Vessels LLC

Main Deck

01 Deck

The R/V *Nathaniel B. Palmer* is operated by Leidos ASC on a long-term charter from Offshore Service Vessels LLC, Galliano, Louisiana. ASC staffs the vessel with a charter representative to coordinate cruise planning and scheduling, and with a technical staff to support science operations. Offshore Service Vessels LLC provides the vessel master, ice pilot, and crew.

The vessel was named after merchant marine and ship builder, Nathaniel B. Palmer (8 August 1799 - 21 June 1877). The son of a Connecticut ship builder, Palmer had a prosperous and adventurous life as a sealer and whaler, a sea captain, and a ship designer and builder. He was a pioneer in the clipper era and some historians credit Palmer with the discovery of Antarctica, although others challenge this view.

The *Palmer*, completed in 1992, is 308 feet long and is ice-classed ABS-A2, capable of breaking three feet of level ice at three knots. The *Palmer* can accommodate 39 scientists and staff in one and two-person staterooms. Each stateroom has a television and computer network connection. The ship has a galley and a common dining area, conference room/library, lounge with audio and visual systems, a sauna, and an exercise room.

Water Column Sampling Equipment			Underway Seawater System		
Blake Trawl	5 ft		The seawater system supplies underway seawater to the Aquarium Room, Wet Lab, Hydro Lab, Helo Deck, Helo Hangar, and Baltic Room. Green strand piping, a non-metallic, chemically resistant material has been used throughout the system to minimize algae and bacterial growth. It also maintains its structural integrity under low temperatures. Large diameter piping and a minimum of 90° turns help prevent frazil ice formation in the system.
