<input checked="" type="checkbox"/>	<input type="checkbox"/>	Questions answered?	Chief Scientist was a bit confused about medical status of some of his students. On the PQ status spreadsheet, in the additional information needed column, he was understanding that the date was the date additional information was sent, not that it was the date medical was requesting additional information. He asked that that be investigated and changed. On looking further into this, it would seem it was a lack of communication between the chief scientist and his students and not our problem.
