Yes	No	Planning	The entire process has improved significantly from my last field season in 2001.	
X	<input type="checkbox"/>	SIP process adequate?		
X	<input type="checkbox"/>	RSP helpful and timely?		
X	<input type="checkbox"/>	POC responsive?		
X	<input type="checkbox"/>	Medical	This area has been improved noticeably since 2001. During the 2001 season the medical processing really bogged down the process.	
		Kits sent out on time?

X	<input type="checkbox"/>	All accomplished? If not, please explain (weather, ice, equipment, personnel).
Really congenial atmosphere, great support. The camcorder case fabricated for project use allowed them to obtain data that would not have been possible with what they had. A tremendous help.		
All accomplished and more. Tremendously good weather, and great support from RPSC and ECO deckhands and bridge officers.

X	<input type="checkbox"/>	Future Cruises If returning for another cruise, are there any additional equipment or support needs your group anticipates?	See comments regarding HTI laptop in Marine Survey. Suggest that a shock absorber system be attached to the HTI (not an issue on this cruise as weather was superlative, but a good idea for the future).

Yes <input type="checkbox"/>	No <input type="checkbox"/>	Other Issues Diving, Zodiac, E-mail support, interactions with stations, etc.
		Many of these questions are redundant with the Marine Survey. All systems etc., were fine. The cruise went very smoothly, and the rapport was excellent. Good luck with the Island pick-up- we really appreciate the consideration given to those of us who would have missed another cruise if we had had to remain through the unknowns surrounding the Island field camp extractions.
