Yes	No	Planning		
<input checked="" type="checkbox"/>	<input type="checkbox"/>	SIP process adequate?	The SIP is more difficult than it needs to be. Alice Doyle was good at keeping track of gear. Sidell didn't hear from her much until the last month but assumed that was because there were no problems, which was the case. Detrich stated that the POC was very prompt in returning his calls and answering any questions.	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	RSP helpful and timely?	Both Sidell and Detrich said that the RSP arrived in a very timely manner.	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	POC responsive?		
Medical				
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Kits sent out on time?	Both Sidell and Detrich stated that the kits came out very early, in fact so early that had they immediately undergone the PQ process, some of the requirements satisfied would have been out of date by the time of their deployment. They received the kits in June 2002 for an April 2003 deployment. In addition, some of the things that were NOT checked as being needed (because they were not needed in June 2002) were in fact going to be needed by the much later April 2003 deployment.

Yes	No	Personnel Issues	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	ECO?	Good - no issues with ECO. It was a very happy ship with a good and efficient crew, for which Sidell and Detrich especially commend Captain Robert Verret. They complimented Capt. Robert on his leadership and management of the ECO crew. It was great working with Capt. Robert, and especially to have his skill at the controls during fish pot recoveries. Winch and deck operations went smoothly and it was very easy to communicate with the ECO crew as well as the RPSC group.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	RPSC?	The RPSC employees were a good, skilled and happy group as well. Sidell and Detrich both said it was great working with Herb Baker as MPC.
