Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	Other Issues Diving, Zodiac, E-mail support, interactions with stations, etc. Chief scientist quarters should be as nicely furnished as the lounge and MPC office. Furniture needs to be more thoroughly secured. It would have been better if technicians were better experienced and familiar with the gear. Need to have more flexibility and be able to switch between different types of gear. For each piece of equipment selected on the SIP, there should be a person on the cruise with specific training for that item. There should be mud traps installed in the sink drains in the labs. Lighting in the dry lab can be improved. A phone should be installed in the Aquarium Room.
